

## **SSAB & SMS Group Forge Groundbreaking Partnership for Fossil-Free Cold Rolling Complex in Luleå**

April 4, 2025

Synopsis: SSAB has signed an Early Service Agreement with SMS group to build a state-of-the-art cold rolling complex in Luleå, Sweden. This facility is a critical part of SSAB's transition to fossil-free steel production, aiming to reduce carbon emissions significantly while boosting production efficiency. The new complex will allow SSAB to enhance the production of high-strength steels, particularly for automotive sectors, utilizing advanced, sustainable technologies.

## **Electrifying Steel: Björneborg Steel Leads World-First Zero-Emission Quicklime Production**

April 4, 2025

Synopsis: A groundbreaking achievement in steel production has been reached at Björneborg Steel, where SaltX and SMA Mineral's Zero Emission Quicklime concept has successfully produced steel using electrically manufactured quicklime. This innovation is a significant step towards sustainable steel production, as it eliminates carbon emissions traditionally associated with quicklime production.

## **Philippi-Hagenbuch Introduces SSAB Zero Steel for Sustainable Haul Truck Solutions**

April 4, 2025

Synopsis: Philippi-Hagenbuch Inc. has expanded its offerings by incorporating SSAB Zero™ steel into its custom haul truck equipment. This eco-friendly steel alternative helps customers meet sustainability targets while maintaining the performance and durability expected from Philippi-Hagenbuch products.

## **Nordec Group's 2024: Steel Structures & Sustainability Drive Record Profitability Amid Green Transition**

April 4, 2025

Synopsis: In 2024, Nordec Group demonstrated impressive profitability and growth, delivering a record 53,000 metric tons of steel structures. Despite challenges in the construction market, the company achieved strong international sales, particularly in Sweden and Central and Eastern Europe, and expanded its presence in the industrial green transition sector, contributing to sustainable development.
